

BUILDING PERMITS

BEFORE STARTING A CONSTRUCTION PROJECT, PLEASE CHECK WITH YOUR MUNICIPALITY or the RESTIGOUCHE RSC TO SEE IF A PERMIT IS REQUIRED.

Whether you are thinking of installing a new deck, fence or swimming pool, or building a new home, there are criteria that will help you ensure the health and safety of the occupants, and improve or sustain an acceptable living standard for all those within the area of your development. These standards are implemented through the approval and issuance of building and development permits.

If your project consists of erecting, locating, relocating, demolishing, altering or repairing a building or structure, these standards are applicable to your project and **a building and development permit is required.**

Please contact us if you are planning a project, or simply have a question pertaining to one of our other services such as building inspection, land subdivision and development, zoning, etc.
