Water Supply Agreement between Tide Head and Atholville

The Municipal Council of Tide Head is pleased to announce that an agreement has been reached between the municipalities of Tide Head and Atholville regarding the supply of water to the Atholville area.

Several wells in the village of Atholville are currently located in a commercial area. By having access to water from Tide Head, these wells can be taken out of service so that the municipality of Atholville can continue the economic development of this commercial area.

Tide Head Mayor Randy Hunter is pleased: *« Water is an essential nutrient for our body's cells, it's a vital need. For more than a decade, engineers have confirmed that Tide Head has an abundant supply of water. It's a time for sharing regional services and we are very happy to be able to help the neighbouring municipality. »*

For his part, Michel Soucy, Mayor of Atholville, said: *« We thank the municipality of Tide Head. Community cooperation is essential to the economic development of our region and this agreement is a good example of this. »*

This is a long-term agreement that will have a major and positive impact on the economic development of the municipalities in the Restigouche region.
